Subject: City of Hayward Comments For Russell City Commission Hearing

CC: "Fran David" <Fran.David@hayward-ca.gov>, "Michael Argentine" <margentin...

Dear Paul,

On behalf of the City Of Hayward I would like to reiterate our support of the PPMD and its approval by the full Commission. As mentioned in our phone conversation today the City of Hayward is requesting of Commission compliance staff that the City be designated as the delegated Construction Building Official (CBO) for this project, since it is expected that once approved the project owner will want to proceed towards construction very quickly. We feel we have both the staff and consultant resources to perform this task and feel that certain areas such as fire department coordination, hazmat issues and coordination of site issues can best be managed by the city. The location of the plant abutting city land and the relationship with our wastewater treatment plant add to this need. While the city has agreed that the WAVE is not appropriate as an aesthetic measure, we are still concerned with the eventual aesthetics of the facility and wants to reiterate our support for the requirements of Condition of Certification, LAND-1, which requires the project owner to submit their development plan to our Planning Department for an advisory review so we can definitely insure this project is a quality addition to our industrial area. Thank you again for your help.
