4/30/01

600 megawatt ⇒ 600,000 people in Alameda and San Mateo Counties.

→ 90% ↓ in emissions

- Recycled water will be used for the project. where does this come from?
- How many Tons of N will be produced daily?
- Where in Alameda co. will energy go.
- Similar to Metcalf.
- Substation adjacent to Baumberg w/in existing substation.

< 2 AC. seasonal Wetlands → jurisdiction → salt grass and other salt tolerant/non-native species.

Sumps will be used to treat / process used recycled water.
