CALIFORNIA ENERGY COMMISSION
REPORT OF CONVERSATION *Page 1 of 1*

Systems Assessment and Facilities Siting Division

FILE: (06-AFC-3)	
PROJECT TITLE: South Bay Replacement Project	

Telephone		X **Meeting Location:** City of Chula Vista			
NAME:	Bill Pfanner	**DATE:**	October 12, 2006	**TIME:**	1:00
WITH:	Kerry Willis, Bill Pfanner. Susan Lee, Hedy Born, Alvin Greenberg, and representatives of the City of Chula Vista.				
SUBJECT:	Community Scoping Meetings for the South Bay Replacement Project				

COMMENTS

On October 12, 2006, staff from the California Energy Commission (CEC) met with representatives of the City of Chula Vista (Linda Wagner – representing Councilman Castaneda; Allison Rolfe, Office of the Mayor; Dana Smith, Assistant City Manager; and Elizabeth Wagner Hull, Assistant City Attorney) to help scope the environmental analysis of the South Bay Replacement Project's Application for Certification (AFC). The following is a summary of the substantive comments and questions received during this scoping sessions.

- What does the change in the RMR mean to the future status of the South Bay Power Plant and the South Bay Replacement Project?
- Can the CEC require the project to have a net beneficial impact on the environment rather than just not having any more impact than the old project as stated in the AFC?
- Can solar residential retrofitting be considered as a project Alternative? What impact would solar development have on the energy system?
- If the City accepts duct firing, will they receive a commitment that there will be no peaker plants in the area?
- Does the CEC have jurisdiction over peaker plants?
