Subject: CEC

Hi Rick,

This is Kenshoo Lai from HonKwang (Shenzhen) company. Nice to contact you.

Actually, we are changing and applying part of our linear adaptors to meet California Standard. Attached is our range that we are applying. You will see that they are not match to your range.

But if you are patient enough to wait about 8 weeks I think we can design our adaptors to meet your demand of your range.

Our concerns are:

1.) RE: PS0913B-120V rated 9Vac, 1.3A (wall wart) and PSS3-120V rated 9Vac, 2.1A (desk top)
Lead time for getting UL 1310 or UL1950 is about 4weeks . Charge is about usd 3,500 for each model.
Lead time for CEC is about 3 weeks.No any charge needed.
We can send you our specification and samples for your ref. first after got your confimation.

2.)RE:PS200R-120V rated 9.6Vdc, 300mA (wall wart)

Do you want this model be designed in switching one or linear one ?

If you have any question you can reach us by the following way:

Kenshoo Lai:
E-mail: kenshoo@honkwang-sz.com.cn
kenshoo@hk.net.tw

Danny Lee:
E-mail: dannylee@honkwang-sz.com.cn

P.S.1. According to our information , the effectuated date of California Standard could be pending at least 6 momths.
P.S.2 We will be in Hon Kong for electric show from 4/14~4/18. So we will reply you after then if we got any request from you. Sorry for this.
