DOCKET
04-AFC-1
DATE MAR 3
RECD. MAR 7

Before the Hearing Board
of the
Bay Area air Quality Management District
State of California

In the Matter of the appeal of CALIFONIANS FOR RENEWABLE ENERGY	)	March 3, 2006
	)	No. 3511
On the city and county of San Francisco San Francisco Electrical Reliability Project. Application 12344	)	PETITION FOR INTERVENTION

Pursuant to the rules of the hearing Board for the BAAQMD Robert Sarvey herby requests intervention in the above captioned proceeding. I timely filed comments on the PDOC on August 31, 2005 for the Project and received responses to my comments from the district on Fevruary 6, 2006. The responses I received to comments 1,2,4 and 5 were non responsive and in direct violation of District rules and regulations . The disrtrict also failed to provide a dust management plan as required by CARB when asbestos is present at a project site. I wish to preserve my rights and present my case to the hearing board specifically challenging the FDOC and the responses recived from the Distircts Permit Division.

Sincerly

Robert Sarvey
