Sacramento, CA 95814

Docket No. 07-AFC-6

Dear Energy Commission:

I am writing in support of the NRG project in Carlsbad, California. I am a registered voter and I have lived in Carlsbad for the past eleven years, 32 years in San Diego County.

In my opinion, the City of Carlsbad and Carlsbad residents do not have anything to complain about. Since NRG owns the land and Caltrans gave permission for future lane expansion, the proposal is in good standing. Anyone who purchased a home within the vicinity of the existing plant knew the electrical plant was there. They could have chosen a home in a different location.

The Carlsbad Chamber of Commerce supports the project because they know that energy is a good industry and the construction and operation of the plant supports local people.

Please vote YES in support of NRG's new plant and project.

Sincerely,

Michael L. Milbrand
