Energy Commission Docket Unit
Docket No. 07-AFC-6
1516 Ninth Street, MS-4
Sacramento, CA 95814

Dear Energy Commission:

I would like to express my support for the proposed Carlsbad Energy Center Project. North San Diego County requires quality and sustainable resources for a reliable and economical supply of electricity. The Carlsbad Energy Center fits that bill for providing energy.

Additionally, this efficient project is right next to existing transmission line. Ratepayers throughout North County will not have to foot the bill for new costly transmission lines that would be needed should the new project be placed anywhere else in the area.

My home is less than one mile from the site and I look forward to having the plant as a neighbor.. Carlsbad is more than hotel rooms and flowers. We have hard-working citizens that are proud to do their share in building America's infrastructure.

Please approve the Carlsbad Energy Center project.
YIMBY!

Sincerely,

Rege Weber
