Public Comment for the proposed Carlsbad Energy Center Power Plant

I would like to make the following written comment to be part of the record of this hearing. I understand that my comments will be posted on the web and be available to the public.

I'm very opposed to this expansion. Such valuable land, and beautiful ocean front should be reserved for the public good; not for corporate profit. But we know how political policy decisions are made, so I'm not optimistic regarding the public/resident wellbeing.
