Subject: Data Response, Set 1C  
Pomona Repower Project (16-SPPE-01)

Dear Lon,

On behalf of AltaGas Pomona Energy Inc. please find attached our data responses to the CEC's Data Requests 5 through 7, dated April 27, 2016.

Please let me know if you have any questions.

Regards,  
CH2M HILL Engineers, Inc.

DR5-1    New or Modified Projects within 6 Miles of the PRP Site

# Introduction

AltaGas Pomona Energy Inc. (AltaGas or the Project Owner) herein provides data responses numbers 5 through 7 to the California Energy Commission (CEC) Staff's Data Requests, Set 1 regarding the Pomona Repower Project (PRP) (16-SPPE-01), dated April 27, 2016 (TN# 211279). Additional time was requested to respond to these data requests in Applicant's letter "Objections to Staff's Data Requests, Set 1 (Nos. 1 through 45)", dated May 13, 2016 (TN# 211460).

# Air Quality

## BACKGROUND

### Cumulative Air Quality Impacts

The application (Section 4.1.8.1) describes the methodology for the cumulative impact analysis but does not include the analysis itself because a project list had not been provided by the District at the time the application was prepared and submitted to the Energy Commission. The cumulative analysis should include all reasonably foreseeable new projects with a potential to emit 5 tons per year or more and located within a 6-mile radius. This includes all projects that have received construction permits but are not yet operational and those that are either in the permitting process or can be expected to be in permitting in the near future. A complete cumulative impacts analysis should identify all existing and planned stationary sources that affect the baseline conditions and consider them in the modeling effort.

## DATA REQUESTS

5. Please provide a copy of the District's correspondence regarding existing and planned cumulative sources located within six miles of the project site.

**Response:** Enclosed as Attachment DR5-1 is a copy of the list recently provided by the SCAQMD of proposed new or modified projects within 6 miles of the Pomona Repower Project (PRP) site. The Applicant reviewed this list to determine whether the projects were actually located within 6 miles of the PRP site and whether each would result in a net emission increase equal to, or greater than, 5 tons per year for NO<sub>x</sub>, CO, SO<sub>x</sub>, or PM<sub>10</sub>. Based on this review, the Applicant has concluded that none of the listed projects meet both of the above requirements. Therefore, none of the listed projects need to be considered for a cumulative air quality impact analysis. The enclosed list includes the reason each project was excluded from a cumulative air quality impact analysis.

6. Please provide the list of sources to be considered in the cumulative air quality impact analysis.

**Response:** Please see Data Response 5.

7. Please provide the cumulative modeling and impact analysis, including Pomona Repower Project (PRP) and other identified new and planned projects within 6 miles of the PRP site.

**Response:** As discussed in Data Response 5, none of the nearby new/modified projects provided by the SCAQMD need to be considered for a cumulative air quality impact analysis.

ATTACHMENT DR5-1,  
New or Modified Projects  
within 6 Miles of the PRP Site

All applications submitted to the District since January 1, 2014
