Dear Mr. Pendergrast:

I write in response to your letter of September 1, 2006, requesting that the Energy Commission put over consideration of a compliance condition issue regarding the AES Huntington Beach Retool Project (Docket #00-AFC-13). I have considered your request and reviewed the background material in the Docket, and respectfully see no reason to delay consideration of the matter to a date other than September 14, 2006.

Sincerely,
