RE: Request for Airport Approach Zoning Plan Map

Dear Mr. Bauman:

In March of this year, Energy Commission staff requested a copy of the map cited in City of Hayward Airport Approach Zoning Regulation §10-6.20 as the "Airport Approach Zoning Plan for the Hayward Air Terminal, Hayward, Alameda County, California" from the Hayward City Clerk. It is our understanding that our request was then forwarded to your office. We have yet to receive a copy of that document, although I did have an opportunity to view it at the Staff Assessment Workshop on July 11, 2007. This document is specifically referenced in an existing City of Hayward regulation, which is discussed at length in Energy Commission staff's assessment of the proposed Russell City project.

Therefore, Energy Commission staff is formally renewing its request for an official, full-size copy of the document referenced above, to be received on or before July 18, 2007. Please send the document to my attention at the following address:

Shaelyn Strattan, Planner II
California Energy Commission
Energy Facilities Siting Division/Environmental Office
1516 9th Street, MS 40
Sacramento, CA 95814-5504

Thank you very much for your help in this matter.

Sincerely,

A handwritten signature in cursive script that reads "Shaelyn Strattan".

Shaelyn Strattan
