I am writing to plead with you. Do not allow the building of 2 proposed power plants in Hayward. They are called **the Russell City Energy Center** and the **Eastshore Energy Center**.

These plants will emit way too many toxins into the air we breathe.

Hayward is not an appropriate place to build these plants, nor is any other densely populated community.

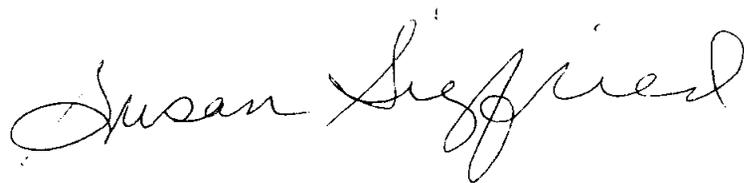

Though these proposed plants are located on the west side of Hayward, the prevailing south and easterly winds off the bay will carry toxins across Hayward, the Hayward Hills, and surrounding areas depending on the wind intensity.

These gas-engine plants release an enormous amount of toxic particulate matter into the air, the air I have to breathe.

Please have compassion on the people of Hayward and do not build the power plants here.

Thank you.

Susan Siegfried  
Hayward Resident, age 67
