To whom it may concern,

As a member of the San Lorenzo community and an employee at Chabot College I implore you to reconider long and hard before allowing the Russell City Power Plant to be located in Hayward. The Power Plant will not only effect Hayward but also impact surrounding communities. The Russell City plant exposes us to pollution and health risks. The Plants towers as well as the plant itself will just add blight to this area.

I don't see this sorta of thing happening in Pleasonton, Hillsdale, or Alamo, because they wouldn't put up with it and they have the money to back it up, but because Hayward and the surrounding areas don't have the money, we become the dumping ground for everything.

It's time to just say NO. We need to protect our health and our communities.

Thank you,  
 Nanette Aldana
