Mr. Byron,

It is with grave concern and amazement that I write this letter to you today. I have been a resident of Hayward, California since I was five years old and actually live in the home where I was raised. I was rather surprised to learn that an enormous power plant is being built near my home. I have received no notice of this, which is preposterous as I would highly object to such a project as I know my neighbors would. I only recently heard of this project through an adjunct teaching position I hold at a local college. I must say I am happy to hear that there is a stay on the project.

I urge you to reconsider your decision as there are plenty of unpopulated places in California where a plant could be built. Why is it a lower to middle class population area is being targeted for the plant location? Might it be that we have a lack of funds to properly fight the plant construction? How might you feel if this power plant were built in your backyard? I would guess your community would not only oppose the plant, but would have the funding to legally oppose the plant.

It is time for you to think about the people of Hayward, California you are impacting including me, my husband, my two boys under age 10, and my parents in their 80's who live with me!!
