Dear Commissioners,

Please deny the application to extend the deadline to build the Russell City Energy Center. We are at a crossroads in our City and this Nation. We need to be investing in our future in clean energy, not in power plants that produce greenhouse gases! We do not need this pollution in Hayward and our City is working towards a climate action plan that will deal with both our local issues and our part of the bigger picture. Please help us do the right thing for our city, our country and our planet by NOT approving the extension for this power plant which will be a "dinosaur" before it is even built.

Thank you for your consideration.

Kindra Mendall
