To the Energy Council Members,

As a citizen of Hayward and of California, I urge you to **DENY THE APPLICATION FOR EXTENSION TO BUILD THE RUSSELL CITY POWER PLANT IN HAYWARD.**

This plant is NOT in the interests of Hayward citizens, nor in the interest of California. At the time this plant was originally conceived, we now know that, PG&E and various energy companies were running a scam on California. Creating a false flag event. There never was a huge power need as was seen. I don't need to go into the ins and outs of the scam for creating a need by selling energy outside of the state and reselling it back to us, as well as shutting down other plants inside so they were not functioning at peak time, thus creating the brownouts that were happening.

As you recall this entire process is what led to the ousting of Gov Grey Davis also, by putting the blame on him, unfairly. This recall was bankrolled by Darrell Issa, a Millionaire Republican congressman of California.

Therefore, these powerplants were a result of a scam against us, as a state. Do we need to carry out the Big Energy Blackmail??? No we don't. do we need to continue in the path of the wanton takeover of California by big business?? Of Course..NO..

Hayward does not want this, no matter what the representative of the city might say to counteract this. We already know that, elected or appointed, they do not sincerely speak for us. Especially when their egos and pocketbooks are on the line.

So please take into consideration the thoughts, feelings, health and well-being of Hayward citizens. Knowing full well, that this plant should not be allowed to proceed.

Yours truly and aware,

Ms Stephania Widger
citizen, biologist and active in Hayward
