1516 NINTH STREET
SACRAMENTO, CA 95814-5512

**NOTICE OF CHANGE OF STATUS OF THE
PETITION TO AMEND
THE ENERGY COMMISSION DECISION for the
LARKSPUR ENERGY FACILITY (01-EP-1C)**

DOCKET
01-EP-1

DATE MAY 15 2007

REC'D. MAY 15 2007

On April 9, 2007, Wildflower Energy LP, filed a petition with the California Energy Commission requesting to modify the Larkspur Energy Facility, and on May 3, 2007, staff issued a Notice of Receipt informing interested parties of the proposed modifications. The 94-megawatt (MW) facility was certified by the Energy Commission on April 9, 2001, and began commercial operation on July 13, 2001. The facility is located in the Otay Mesa area of the City of San Diego in San Diego County at the intersection of Otay Mesa Road and Harvest Road.

The modifications proposed in the April 9th petition would add one General Electric (GE) LM6000 combustion turbine generator and a temporary construction laydown area to the existing Larkspur Energy Facility. The facility currently contains two GE LM6000 CTG units. The modifications would increase power generation capacity from 94 MW to 141 MW. A 600 kilowatt natural gas-fired reciprocating engine would also be installed to provide black start capabilities.

On May 7, 2007, Wildflower Energy LP, contacted the Commission and placed the amendment on hold after being informed that San Diego Gas and Electric (SDG&E) would not sign the Power Purchase Agreement for the proposed modifications at the present time. It appears that SDG&E has concerns regarding transmission capacity in the local area. The project owner intends to complete a transmission study to address those concerns. However, as the results will not be known for several months, the project has been placed on hold until the transmission information is made available.

This Notice is being mailed to interested parties and property owners adjacent to the project site who may want to participate in the amendment process. You may visit our Website at www.energy.ca.gov/listservers/index.html to sign up for email notification of all future filings posted for this project. If you would like your name removed from the mailing list, please call toll free to 1-800-858-0784 or e-mail Marci Errecart at merreacar@energy.state.ca.us.

Another notice will be mailed to the Larkspur mailing list and will be posted on the Commission's website when Wildflower Energy LP advises the Commission they intend to proceed with their amendment request.

Date: May 15, 2007
