**REQUEST FOR COMMENTS
ON THE
DEPARTMENT OF WATER RESOURCES'
PROPOSED MODIFICATIONS TO CONDITIONS OF CERTIFICATION
FOR THE BOTTLE ROCK GEOTHERMAL POWER PLANT
(Docket No. 79-AFC-40)**

On January 15, 1991, the Department of Water Resources (DWR) notified the California Energy Commission (CEC) that operations at the Bottle Rock Power Plant and Francisco steam field located in Lake County were temporarily suspended.

On December 17, 1991, DWR submitted to the CEC staff a request to amend the Conditions of Certification to accommodate the suspension of operations. The amendment request contains a complete set of all amended Conditions of Certification proposed for adoption at a future Commission Business Meeting.

The purpose of the Commission's amendment review process is to assess the impacts on environmental quality, public health and safety, and to assess the consistency of the proposed changes with the Commission's decision on the case. Upon receipt of an amendment request, the Commission notifies interested parties, completes a staff analysis, and hears the amendment proposal at a regularly scheduled business meeting.

Part of the CEC's review process involves consideration of public comment on proposed changes. If you have any questions or wish to make comments regarding DWR's Request to Amend, please contact Ms. Jeri Scott, Energy Analyst, within 10 days of the date of this notice at the address on the enclosed Amendment Information Response Form, or call (916) 654-4228.

If you would like to receive a copy of DWR's Request to Amend, the CEC staff analysis and/or the final Commission Order, please complete and return the enclosed Amendment Information Response Form.

For information on how you may participate in the amendment process, please contact the Commission's Public Advisor, Tracey Buck-Walsh, at (916) 654-4489, or toll-free in California at (800) 822-6228. News media inquiries should be directed to Assistant Executive Director Claudia Barker at (916) 654-4989.
