Background

In 2004, the Legislature adopted Senate Bill 1565 (Bowen, Chapter 692, Statutes of 2004), which directed the Energy Commission to adopt a strategic transmission investment plan for the state. The strategic plan is to be included in the IEPR and "shall

identify and recommend actions required to implement investments needed to ensure reliability, relieve congestion, and meet future growth in load and generation, including, but not limited to, renewable resources, energy efficiency, and other demand reduction measures.” (Public Resources Code section 25324) The Draft *2009 Strategic Transmission Investment Plan* will be available from the Energy Commission’s website by October 1, 2009, at [www.energy.ca.gov/2009_energypolicy/index.html].

The Draft *2009 Strategic Transmission Investment Plan* is based on the public record developed during the 2009 IEPR proceeding, which includes extensive public and stakeholder input, written comments, and presentations, as well as responses to transmission-related data requests. This and other information, including workshop transcripts, can be found at [www.energy.ca.gov/2009_energypolicy/documents/index.html].

Purpose

This hearing will provide a forum for public comment on the Committees’ recommendations before the Draft *2009 Strategic Transmission Investment Plan* is considered for adoption by the full Energy Commission at its December 2, 2009 Business Meeting. In addition, the IEPR Committee is scheduled to release its Committee Draft *2009 IEPR* by early October and will hold a hearing on October 14, 2009 to receive comments on that report. The IEPR hearing will be noticed separately.
