<b>DOCKET</b> <b>11-IEP-1J</b>
-----------------------------------

DATE <u>AUG 01 2011</u>
-------------------------

RECD. <u>AUG 01 2011</u>
--------------------------

Dear commissioner,

The out dated SONGS reactor is dangerous and needs to be shut down. As the data and research points out the structures do not come anywhere close to standing up the building codes that are required today.

The fact that such a large population is in harm's way when the next overdue earth quake will occur, it is negligent in my opinion the keep the facility operational and storing the waste.

The cost of shutting down SONGS vs. the humane and economic toll an accident or attack would have, is elementary when I consider the effect it would have on my daughter, Sunny's generation.

Long term prosperity to not a product of short term delays.

Thank you for thinking of the next generation!

Best,

~Ron May~
