Subject: IEPR
Attachments: Cumulative Renewable Projects as of 1-23-12.pdf

Hello Lynette,

You are listed as the contact person on the CEC website. Is there any remaining public comment left on the IEPR?

http://www.energy.ca.gov/2011_energypolicy/notices/2012-02-15_notice_of_availability_2011_IEPR.pdf

What remaining approvals are needed and what is the timeline?

Our rural low-income community is being disproportionately impacted and I missed the previous comment deadlines--too overwhelmed with the number and size of projects and so many overlapping comment deadlines.

Please see the attached map that is already out of date and does not show at least 5 additional tracking CPV projects slated for our community at undisclosed locations--but they have an approved PPA with SDG&E. Altogether I think they cover about 66 square miles of our community planning area that is about 172 square miles.

Thank you,

Donna Tisdale, Chair
