Re: *13-IEP-1C Electricity Demand Forecast*

To Docket Office:

On April 15, 2013, Southern California Edison Company ("SCE") submitted a CD containing Forms 1 through 7 of the Integrated Energy Policy Report Electricity Demand Forecast to the California Energy Commission. SCE recently discovered that there is an error in Form 2.2. This letter transmits a corrected Form 2.2.

Specifically, in calculating column G, or "Commercial - Large," SCE inadvertently multiplied, instead of divided, its base forecast by its California Gross State Product deflator series forecast. Please accept this revised version of Form 2.2 as a correction to SCE's April 15th submission.

If you have any questions or require additional information, please contact Carl H. Silsbee at (626) 302-1708.

Very truly yours,

Veronica Flores-Ochoa
