Categories: Ready to Docket

Dear CEC: My comment states the need for clarity on the relationship of the EPIC plan and its relationship with the CPUC's Strategic Plan (and the CEC's Plan for HVAC), the resulting Action Plans and roadmaps including Codes & Standards AP, HVAC AP, Lighting AP, Plug Loads (Roadmap), Research & Technology AP (launching shortly), and Zero Net Energy (Commercial) AP, along with the somewhat more detailed investor-owned utilities energy efficiency Program Investment Plans for 2013-2014. All of these activities are on differing timelines, activity levels, and organizational/volunteer involvements, commitments and capacity. I believe it would be useful to see the overall schema on how all of these initiatives from the Strategic Plan 'downward' will align and integrate. Integration of all these components is a foundational task as it is from optimizing building energy performance up through organizational (public/private) and individual ability to effectively respond to the various moving pieces that are already or about to be set in motion.
