**Subject:** Docket Number12-EPIC-01 EPIC Second Investment Plan

California Energy Commission

**DOCKETED**

**12-EPIC-01**

TN 72859

MAR 28 2014

The California League of Food Processors (CLFP) has reviewed the EPIC Investment Plan and recommends that proposed programs related to the Water Energy Nexus (WEN) be expanded to include the industrial sector, and specifically the food processing industry. Food processors tend to use significant amounts of both energy and water and could benefit significantly from initiatives that could be developed under the auspices of the EPIC program. CLFP believes that a partnership between the EPIC program, private industry, and university researchers could result in innovative and effective strategies, metrics, and technologies that will make food processors and other segments of the industrial more efficient. CLFP would be glad to participate in that effort.

Feel free to contact me if you have any questions.
