Dear Chris Gekas,

My name is Josh Peete. I am a California resident and a public school teacher in Siskiyou County. This message is in regards to the plan to make PCTs mandatory in all California homes.

My family is strongly opposed to this addition to Title 24. We, like most Californians, run a responsible household. We use a reasonable amount of energy and feel that the government has no right to sanction the temperature of my home. This issue will surely develop into a hotbed of controversy as newspapers start covering the issue this week. Instead of forcing citizens to comply, the best way would be to stick with the status quo. Provide homeowners with an incentive to choose to adopt this technology. Have faith in the reasonableness of most California residents to choose what is best for their families.
