Docket No. 07-BTSD-1

To Whom it May Concern:

The utility companies have no right to monitor our energy in our homes. How many times have we been taxed and surcharged, and prices raised so that energy companies could build more plants? Somehow it never seems to happen. There are people in California paying up to 600.00 to 900.00 a month for electricity in the hot months. It is craziness. I was paying almost \$300.00 with a new energy saving air conditioner and thermostat on 82 in the day and 78 at night. No matter how much we save on energy, the price goes up for less energy use, yet that is still not enough for you. Now you want to interfere in our private lives to suck more out of us.

California is fast becoming a socialist state and we have had enough. Keep pushing and you will find that the people will either rise up or move out of the state. We are sick to death of your meddling in our lives.

Sincerely,

Mike and Ramona Farias
