Subject: Big Brother to control Thermostats in homes?

California Energy Commission: (RE: set to consider this proposal January 30,2008)

The State of California cannot do anything right. Just look at the budgeting process and the DMV. Now, some lame-ass government boob wants to control the temperature in my house? I know, I know- you are from the government and you are here to help me! Now, if the elected jackasses in Sacramento can (1) control spending to the same level as revenue, (2) fix the DMV, (3) fix the pot holes in the roads and (4) find a way to control the illegal immigration & crime problems (mostly one in the same), maybe, just maybe I would let them control my thermostat. But, do not count on it.

As the Sacramento Legislative Clowns continue to mismanage this state and allow laws/rules that take away the individual rights of the legal citizens (illegals have no rights), pretty soon there will even be a bigger problem to face. Hard working citizens & taxpayers are cashing out and leaving this once great state. Pretty soon, the only people left will be the illegals, the welfare rats, the legislators (both active and retired), state workers (both active and retired), and the Hollywood ~~leftist~~/socialists. Who then will pay the bill? And, cannot you just wait to see what the in-breeding of these "special" groups will bring!!

One last thing: I am SURE that our esteemed leaders in Sacramento will find a way to exempt themselves from the nanny-state intrusion!
