Commissioners:

The proposal in Docket No. 07-BTSD-1 is at first glance real nice sounding. But after reading for less than a minute it becomes obvious that 1984 has arrived. I suspect that the device will also be able to transmit sound so than the residents of the living unit can be monitored at all times, to protect them of course.

I would like to propose a test case. Install the devices in your own homes and those of all elected and appointed public officials, and let me control them when it is important to save energy for the "public good". Don't worry, I am a very considerate person, I wouldn't play games with this power (pardon the pun).

Larry
