To Whom it May Concern,

The logic behind "smart thermostats" is way off base. This is just another opportunity for intrusion into the lives of our citizens. I do not want the government telling me how warm or cool my house should be. I do not have air conditioning and I can usually put up with the 10 or so hot days a year in my area. If one lives in a heat or cold prone area, then that person should pay surcharges for above average energy use. But, don't come into my house and tell me how to live.
