Dear Sirs,

The problem is that I am almost 94 and I suffer if I am cold, so I keep my thermostat at 74 day AND night, so I can be comfortable. I am sorry, but I do not think I could stand it any less warm, so please do not set my house temperature at a lower temperature. I am happy to pay the higher price, in order to be comfortable. Thank you.

Sincerely,

Laura Vroman from southern California
