Subject: Fwd: Government Control Thermostats

>>> "Arnold Greenberg" <arnieg@mantech-si.com> 1/12/2008 9:46 AM >>>

Again government wants to help me. NO THANKS!!!

Although I will not be affected personally should this Big Brother plan get approved it would be another intrusion buy government to manage another aspect of my life. I think most people are directly affected by the cost of energy and that in itself is enough incentive to set thermostats up or down.

Stop wasting the tax payers' money on dumb projects and allow drilling for more US oil and natural gas. Build a few more hydroelectric dams and nuclear power plants and you won't have to micromanage the citizens of California.

Thank you,

ArnoldGreenberg
