**Subject:** PCT'S

You made a good decision to back off mandating the installation of PCT's. When you start thinking about more stuff to impose on us in the future, remember one thing. We still have a Constitution, at least for now. And we still have some rights, at least for now. You may eventually get your communist ways pushed through, but hopefully not till I'm dead and gone and this country is called the United Socialist States of America. Shame on you for trying this and shame on COMRADE Arnold to let you!

Tehachapi

P.S. My current electric bill rarely runs over \$50.00/month, and probably averages around \$40/ month.
