Desert Renewable Energy Conservation Plan

Comments (Please print clearly and legibly)

Please hand in during the meeting or mail (address on back) or email by August 9, 2012. Those submitting comments electronically should provide them by email in either Microsoft Word format or as a Portable Document Format (PDF) to docket@energy.ca.gov. Please include your name or organization's name in the file name.

Name: Stephanie Weigel

Organization (if any): Sonoran Institute

Address (optional): c/o JTNP, 74485 Nat'l Park Drive, ~~Twentynine Palms, CA~~

City, State, Zip: Twentynine Palms, CA

E-mail: SWeigel@sonoraninstitute.org

This comment form is being furnished to obtain suggestions and information from other agencies and the public on the DRECP Alternatives. All comments received, including names and addresses, will become part of the official administrative record and may be made available to the public.

Comments (Please print clearly and legibly)

1. For ALL maps - State Highway 62 through the Morongo Basin is missing on the maps. Please add the highway to the maps as the other state highways appear and this road serves as a useful reference point in this area between the MCA (66 in 29 Palms and Joshua Tree National Park.

1. Regarding the area to the north/east of 29 Palms on the maps that does not show up as biologically sensitive -- were the linkage design areas that are part of the SC Wildlands Study "The Joshua Tree - 29 Palms connection" used to define the biologically sensitive areas? As there are several linkage design branches in that area I ~~would~~ wonder why they don't show as biologically sensitive ~~when similar areas to~~ ^{back} when similar areas to

the west of 29 Palms do. While the JT-29 Palms data may not have been included in the initial release of the Desert Linkage Design, my discussions with Kristeen Perrod indicate that they are an integral component of the overall connectivity analysis for the desert.
