To California Energy Commissions,

I have been going to El Mirage Dry Lakes since I was born, I learned to drive a car, ride a motorcycle, and even race land speed racing. I was first introduced to the lakebed when I was very young. My Mother and Father had taken me there one year while on vacation. They had told me that there parents had also vacationed there with them when they were children. They wanted me to have the experiences that they did, to learn, and become an individual from these involvements.

I have always enjoyed the many different types of wild life and beautiful scenery. Some of the best memories of my life were at El Mirage such as searching for rocks, seeing many types of reptiles, catching lizards and snakes, and even being chased by wild dogs on my dirt bike.

El Mirage has been a very significant part of my life and I would love to keep this area preserved for future land speed racing and other outdoor activities.

Sincerely,

Bill Lattin, SCTA president
