*Hi Chris,*

*Thanks for the quick response to my DRECP comments. The extended comment period is appreciated by all involved.*

*In support of scenario # 2, I hope the list of studies and peer review comments from the Significant Ecological Area Technical Advisory Committee (SEATAC) will provide useful information about the West Antelope Valley.*

Hi Verne:

Here is what I know from the time I began with SEATAC. I have yet to make an index from previous periods, but you could look through the minutes that are posted. All reports are public record.

We began posting studies online in 2011. These should always be considered along with the SEATAC minutes that critiqued the reports, as the reports may not always be judged accurate by SEATAC. The minutes alone are a sort of study by the SEATAC members. These are all accessible via links on the SEATAC webpage:
