When submitting comments on the Draft DRECP and EIR/EIS, please include the name and means of contact for a person who would be available for later consultation if necessary. Please note that public comments and information submitted will be available for public review at www.drecp.org. Before including your address, phone number, email address, or other personal identifying information in your comment, be aware that any information submitted as part of your comment will become part of the public record. Additionally, this information may become available via Google, Yahoo, and any other internet search engines. You may choose to withhold contact information, but the agencies will not be able to consult with you if clarification of your comment is needed. While you may request in your comment to withhold your personal identifying information from public review, agencies cannot guarantee the ability to do so.

1						This plan dismisses dispersed rooftop or urban parking lot solar PV generation as a non-viable alternative. This is LUDICROUS. A full analysis of equivalent investment in the user locale (cities) of PV panels vs in desert with hundreds of miles of transmission lines and damage to water, plant & animal resources & rate payer costs, must be done for this EIS to be an honest and complete process & document.

If this alternative is analyzed I am confident that the DRECP will be proven to be nothing more than a scheme to enrich power co's. with harm to all others.
