

Re: DRECP NEPA/CEQA.

To whom it may concern:

My name is Jennifer Bergmann. I would like to raise the absolute opposition of the construction of solar, wind, and geothermal plants. I am dearly concerned about the incompatible environment that would ruin visual, noise, ugly, and will ruin beautiful God-created flowers, plants, and other species. Moreover, I am very concerned about the rural especially in Imperial County where the solar , wind, geothermal industries should not construct because the swath is too big than elsewhere in the north except San Bernardino County. Also, I am afraid that if the green industry constructs any method of generating electricity would encroach too close to the lakes and rivers. I oppose all of green industry for another reason is that water is so scarcity that something green industry requires to hum the plants and community REALLY needs water for their lives. For example, the solar thermal plant would consume a lot of water. Another plant of this type, it would worsen because it would consume MORE water!

I urge you of all agencies include the California Energy Commission to reject (without preferred alternatives). I absolutely prefer no alternatives because many homes and businesses have rooftop solar panels.

I urge you to STOP building more large-scale green plants in the RURAL and DESERT AREAS!!

Sincerely,  
Jennifer Bergmann
