California Energy Commission  
Dockets Office, MS-4  
Docket No. 09-RENEW EO-01  
1516 Ninth Street  
Sacramento, CA 95814-5512

Dear California Energy Commission,

Regarding "DRECP NEPA/CEQA", would it not be possible to retain some public access to geological sites such as the Marble Mountains? To close off this exposure to science and nature that sites such as these have provided to generations of young people is really unfortunate and short sighted. Collecting fossils and minerals has opened new vistas to the mind, and left wonderful memories. Leaving young people with video games as their past time is hardly a contribution to the future. Energy indeed needs to be conserved, but so does intellectual curiosity. Thank you for any consideration of these comments.

Sincerely,

*David P Bradbury*
