Mr. Chris Beale

1516 Ninth Street, MS-46, Dockets Office, MS-4, Docket No. 09-RENEW  
EO-01  
Sacramento, CA 95814-5512

Dear Mr. Beale,

As someone who cares about our California desert and our renewable energy future, it is essential that the 22.5 million acre Desert Renewable Energy Conservation Plan is finalized in a thoughtful way.

With this in mind and with the goal of protecting our national parks, wilderness areas, wildlife and wild places for future generations, I strongly encourage you to improve this important plan in order to better protect its public resources:

- \* Protect Mojave National Preserve, adjacent Wilderness Study Areas, and key desert bighorn sheep habitat by not allowing the Soda Mountain Solar project to be sited next door to Mojave NP, as better locations for the project abound.
- \* Protect the remarkable Silurian Valley adjacent to Death Valley National Park by designating the landscape as National Conservation Lands.
- \* Better protect Joshua Tree National Park by preventing development in the Eagle Mountain region. We must safeguard public lands in this region from further threats and protect important habitat for desert bighorn sheep, golden eagles, and desert tortoise.
- \* Do not allow for renewable energy Development Focus Areas (DFA) to be designated in sensitive lands. The Lucerne region, the desert tortoise research natural area, Cadiz dunes area, and the Mountain Pass area should not be considered for DFAs.
- \* Protect wildlife routes and bird migration areas by supporting the protection of Sonoran Desert Thorn Woodlands, Sand Movement corridors, and important wetlands like the Wild and Scenic Amargosa River, Salt Creek, and Bonanza Spring.
- \* Analyze how this plan impacts the National Park Service. Despite the significant acreage of our national parks in the plan area, the draft does not include discussion of how renewable energy projects will impact their viewsheds, clear night skies, and wildlife-rich neighboring lands.

Thank you for standing up for the California Desert!

Sincerely,

Ms. Kiyō Hayasaka  
1930 E 27th St  
Oakland, CA 94606-3466

Mr. Chris Beale

1516 Ninth Street, MS-46, Dockets Office, MS-4, Docket No. 09-RENEW  
EO-01  
Sacramento, CA 95814-5512

Dear Mr. Beale,

As someone who cares about our California desert and our renewable energy future, it is essential that the 22.5 million acre Desert Renewable Energy Conservation Plan is finalized in a thoughtful way. With this in mind and with the goal of protecting our national parks, wilderness areas, wildlife and wild places for future generations, I strongly encourage you to improve this important plan in order to better protect its public resources:

- \* Protect Mojave National Preserve, adjacent Wilderness Study Areas, and key desert bighorn sheep habitat by not allowing the Soda Mountain Solar project to be sited next door to Mojave NP, as better locations for the project abound.
- \* Protect the remarkable Silurian Valley adjacent to Death Valley National Park by designating the landscape as National Conservation Lands.
- \* Better protect Joshua Tree National Park by preventing development in the Eagle Mountain region. We must safeguard public lands in this region from further threats and protect important habitat for desert bighorn sheep, golden eagles, and desert tortoise.
- \* Do not allow for renewable energy Development Focus Areas (DFA) to be designated in sensitive lands. The Lucerne region, the desert tortoise research natural area, Cadiz dunes area, and the Mountain Pass area should not be considered for DFAs.
- \* Protect wildlife routes and bird migration areas by supporting the protection of Sonoran Desert Thorn Woodlands, Sand Movement corridors, and important wetlands like the Wild and Scenic Amargosa River, Salt Creek, and Bonanza Spring.
- \* Analyze how this plan impacts the National Park Service. Despite the significant acreage of our national parks in the plan area, the draft does not include discussion of how renewable energy projects will impact their viewsheds, clear night skies, and wildlife-rich neighboring lands.

Thank you for standing up for the California Desert!

- \* Protect Mojave National Preserve, adjacent Wilderness Study Areas, and key desert bighorn sheep habitat by not allowing the Soda Mountain Solar project to be sited next door to Mojave NP, as better locations for the project abound.
- \* Protect the remarkable Silurian Valley adjacent to Death Valley National Park by designating the landscape as National Conservation Lands.
- \* Better protect Joshua Tree National Park by preventing development in the Eagle Mountain region. We must safeguard public lands in this region from further threats and protect important habitat for desert bighorn sheep, golden eagles, and desert tortoise.
- \* Do not allow for renewable energy Development Focus Areas (DFA) to be designated in sensitive lands. The Lucerne region, the desert tortoise research natural area, Cadiz dunes area, and the Mountain Pass area should not be considered for DFAs.
- \* Protect wildlife routes and bird migration areas by supporting the protection of Sonoran Desert Thorn Woodlands, Sand Movement corridors, and important wetlands like the Wild and Scenic Amargosa River, Salt Creek, and Bonanza Spring.
- \* Analyze how this plan impacts the National Park Service. Despite the significant acreage of our national parks in the plan area, the draft does not include discussion of how renewable energy projects will impact their viewsheds, clear night skies, and wildlife-rich neighboring lands.

Thank you for standing up for the California Desert!

Sincerely,

Mr. Denny Blum  
2829 Dahle St  
Madison, WI 53704-4519

Mr. Chris Beale

1516 Ninth Street, MS-46, Dockets Office, MS-4, Docket No. 09-RENEW  
EO-01  
Sacramento, CA 95814-5512

Dear Mr. Beale,

As someone who cares about our California desert and our renewable energy future, it is essential that the 22.5 million acre Desert Renewable Energy Conservation Plan is finalized in a thoughtful way. With this in mind and with the goal of protecting our national parks, wilderness areas, wildlife and wild places for future generations, I strongly encourage you to improve this important plan in order to better protect its public resources:

- \* Protect Mojave National Preserve, adjacent Wilderness Study Areas, and key desert bighorn sheep habitat by not allowing the Soda Mountain Solar project to be sited next door to Mojave NP, as better locations for the project abound.
- \* Protect the remarkable Silurian Valley adjacent to Death Valley National Park by designating the landscape as National Conservation Lands.
- \* Better protect Joshua Tree National Park by preventing development in the Eagle Mountain region. We must safeguard public lands in this region from further threats and protect important habitat for desert bighorn sheep, golden eagles, and desert tortoise.
- \* Do not allow for renewable energy Development Focus Areas (DFA) to be designated in sensitive lands. The Lucerne region, the desert tortoise research natural area, Cadiz dunes area, and the Mountain Pass area should not be considered for DFAs.
- \* Protect wildlife routes and bird migration areas by supporting the protection of Sonoran Desert Thorn Woodlands, Sand Movement corridors, and important wetlands like the Wild and Scenic Amargosa River, Salt Creek, and Bonanza Spring.
- \* Analyze how this plan impacts the National Park Service. Despite the significant acreage of our national parks in the plan area, the draft does not include discussion of how renewable energy projects will impact their viewsheds, clear night skies, and wildlife-rich neighboring lands.

1516 Ninth Street, MS-46, Dockets Office, MS-4, Docket No. 09-RENEW  
EO-01  
Sacramento, CA 95814-5512

Dear Mr. Beale,

As someone who cares about our California desert and our renewable energy future, it is essential that the 22.5 million acre Desert Renewable Energy Conservation Plan is finalized in a thoughtful way. With this in mind and with the goal of protecting our national parks, wilderness areas, wildlife and wild places for future generations, I strongly encourage you to improve this important plan in order to better protect its public resources:

- \* Protect Mojave National Preserve, adjacent Wilderness Study Areas, and key desert bighorn sheep habitat by not allowing the Soda Mountain Solar project to be sited next door to Mojave NP, as better locations for the project abound.
- \* Protect the remarkable Silurian Valley adjacent to Death Valley National Park by designating the landscape as National Conservation Lands.
- \* Better protect Joshua Tree National Park by preventing development in the Eagle Mountain region. We must safeguard public lands in this region from further threats and protect important habitat for desert bighorn sheep, golden eagles, and desert tortoise.
- \* Do not allow for renewable energy Development Focus Areas (DFA) to be designated in sensitive lands. The Lucerne region, the desert tortoise research natural area, Cadiz dunes area, and the Mountain Pass area should not be considered for DFAs.
- \* Protect wildlife routes and bird migration areas by supporting the protection of Sonoran Desert Thorn Woodlands, Sand Movement corridors, and important wetlands like the Wild and Scenic Amargosa River, Salt Creek, and Bonanza Spring.
- \* Analyze how this plan impacts the National Park Service. Despite the significant acreage of our national parks in the plan area, the draft does not include discussion of how renewable energy projects will impact their viewsheds, clear night skies, and wildlife-rich neighboring lands.

Thank you for standing up for the California Desert!

Sincerely,

Miss Carollina Kormann  
Oliveira, 65

Feb 20, 2015

Mr. Chris Beale

1516 Ninth Street, MS-46, Dockets Office, MS-4, Docket No. 09-RENEW  
EO-01  
Sacramento, CA 95814-5512

Dear Mr. Beale,

As someone who cares about our California desert and our renewable energy future, it is essential that the 22.5 million acre Desert Renewable Energy Conservation Plan is finalized in a thoughtful way. With this in mind and with the goal of protecting our national parks, wilderness areas, wildlife and wild places for future generations, I strongly encourage you to improve this important plan in order to better protect its public resources:

- \* Protect Mojave National Preserve, adjacent Wilderness Study Areas, and key desert bighorn sheep habitat by not allowing the Soda Mountain Solar project to be sited next door to Mojave NP, as better locations for the project abound.
- \* Protect the remarkable Silurian Valley adjacent to Death Valley National Park by designating the landscape as National Conservation Lands.
- \* Better protect Joshua Tree National Park by preventing development in the Eagle Mountain region. We must safeguard public lands in this region from further threats and protect important habitat for desert bighorn sheep, golden eagles, and desert tortoise.
- \* Do not allow for renewable energy Development Focus Areas (DFA) to be designated in sensitive lands. The Lucerne region, the desert tortoise research natural area, Cadiz dunes area, and the Mountain Pass area should not be considered for DFAs.
- \* Protect wildlife routes and bird migration areas by supporting the protection of Sonoran Desert Thorn Woodlands, Sand Movement corridors, and important wetlands like the Wild and Scenic Amargosa River, Salt Creek, and Bonanza Spring.
- \* Analyze how this plan impacts the National Park Service. Despite the significant acreage of our national parks in the plan area, the draft does not include discussion of how renewable energy projects will impact their viewsheds, clear night skies, and wildlife-rich neighboring lands.

Thank you for standing up for the California Desert!

Sincerely,

Mr. Dennis Dougherty  
1000 Bayhills Dr  
San Rafael, CA 94903-3095

Feb 20, 2015

Mr. Chris Beale

1516 Ninth Street, MS-46, Dockets Office, MS-4, Docket No. 09-RENEW  
EO-01  
Sacramento, CA 95814-5512

Dear Mr. Beale,

As someone who cares about our California desert and our renewable energy future, it is essential that the 22.5 million acre Desert Renewable Energy Conservation Plan is finalized in a thoughtful way. With this in mind and with the goal of protecting our national parks, wilderness areas, wildlife and wild places for future generations, I strongly encourage you to improve this important plan in order to better protect its public resources:

- \* Protect Mojave National Preserve, adjacent Wilderness Study Areas, and key desert bighorn sheep habitat by not allowing the Soda Mountain Solar project to be sited next door to Mojave NP, as better locations for the project abound.
- \* Protect the remarkable Silurian Valley adjacent to Death Valley National Park by designating the landscape as National Conservation Lands.
- \* Better protect Joshua Tree National Park by preventing development in the Eagle Mountain region. We must safeguard public lands in this region from further threats and protect important habitat for desert bighorn sheep, golden eagles, and desert tortoise.
- \* Do not allow for renewable energy Development Focus Areas (DFA) to be designated in sensitive lands. The Lucerne region, the desert tortoise research natural area, Cadiz dunes area, and the Mountain Pass area should not be considered for DFAs.
- \* Protect wildlife routes and bird migration areas by supporting the protection of Sonoran Desert Thorn Woodlands, Sand Movement corridors, and important wetlands like the Wild and Scenic Amargosa River, Salt Creek, and Bonanza Spring.
- \* Analyze how this plan impacts the National Park Service. Despite the significant acreage of our national parks in the plan area, the draft does not include discussion of how renewable energy projects will impact their viewsheds, clear night skies, and wildlife-rich neighboring lands.

Thank you for standing up for the California Desert!

Sincerely,

Mr. George Boggs

- \* Protect Mojave National Preserve, adjacent Wilderness Study Areas, and key desert bighorn sheep habitat by not allowing the Soda Mountain Solar project to be sited next door to Mojave NP, as better locations for the project abound.
- \* Protect the remarkable Silurian Valley adjacent to Death Valley National Park by designating the landscape as National Conservation Lands.
- \* Better protect Joshua Tree National Park by preventing development in the Eagle Mountain region. We must safeguard public lands in this region from further threats and protect important habitat for desert bighorn sheep, golden eagles, and desert tortoise.
- \* Do not allow for renewable energy Development Focus Areas (DFA) to be designated in sensitive lands. The Lucerne region, the desert tortoise research natural area, Cadiz dunes area, and the Mountain Pass area should not be considered for DFAs.
- \* Protect wildlife routes and bird migration areas by supporting the protection of Sonoran Desert Thorn Woodlands, Sand Movement corridors, and important wetlands like the Wild and Scenic Amargosa River, Salt Creek, and Bonanza Spring.
- \* Analyze how this plan impacts the National Park Service. Despite the significant acreage of our national parks in the plan area, the draft does not include discussion of how renewable energy projects will impact their viewsheds, clear night skies, and wildlife-rich neighboring lands.

Thank you for standing up for the California Desert!

Sincerely,

Ms. Catherine George  
1836 Locust St  
Napa, CA 94559-4464

Mr. Chris Beale

1516 Ninth Street, MS-46, Dockets Office, MS-4, Docket No. 09-RENEW  
EO-01  
Sacramento, CA 95814-5512

Dear Mr. Beale,

As someone who cares about our California desert and our renewable energy future, it is essential that the 22.5 million acre Desert Renewable Energy Conservation Plan is finalized in a thoughtful way. With this in mind and with the goal of protecting our national parks, wilderness areas, wildlife and wild places for future generations, I strongly encourage you to improve this important plan in order to better protect its public resources:

- \* Protect Mojave National Preserve, adjacent Wilderness Study Areas, and key desert bighorn sheep habitat by not allowing the Soda Mountain Solar project to be sited next door to Mojave NP, as better locations for the project abound.
- \* Protect the remarkable Silurian Valley adjacent to Death Valley National Park by designating the landscape as National Conservation Lands.
- \* Better protect Joshua Tree National Park by preventing development in the Eagle Mountain region. We must safeguard public lands in this region from further threats and protect important habitat for desert bighorn sheep, golden eagles, and desert tortoise.
- \* Do not allow for renewable energy Development Focus Areas (DFA) to be designated in sensitive lands. The Lucerne region, the desert tortoise research natural area, Cadiz dunes area, and the Mountain Pass area should not be considered for DFAs.
- \* Protect wildlife routes and bird migration areas by supporting the protection of Sonoran Desert Thorn Woodlands, Sand Movement corridors, and important wetlands like the Wild and Scenic Amargosa River, Salt Creek, and Bonanza Spring.

Dear Mr. Beale,

As someone who cares about our California desert and our renewable energy future, it is essential that the 22.5 million acre Desert Renewable Energy Conservation Plan is finalized in a thoughtful way. With this in mind and with the goal of protecting our national parks, wilderness areas, wildlife and wild places for future generations, I strongly encourage you to improve this important plan in order to better protect its public resources:

- \* Protect Mojave National Preserve, adjacent Wilderness Study Areas, and key desert bighorn sheep habitat by not allowing the Soda Mountain Solar project to be sited next door to Mojave NP, as better locations for the project abound.
- \* Protect the remarkable Silurian Valley adjacent to Death Valley National Park by designating the landscape as National Conservation Lands.
- \* Better protect Joshua Tree National Park by preventing development in the Eagle Mountain region. We must safeguard public lands in this region from further threats and protect important habitat for desert bighorn sheep, golden eagles, and desert tortoise.
- \* Do not allow for renewable energy Development Focus Areas (DFA) to be designated in sensitive lands. The Lucerne region, the desert tortoise research natural area, Cadiz dunes area, and the Mountain Pass area should not be considered for DFAs.
- \* Protect wildlife routes and bird migration areas by supporting the protection of Sonoran Desert Thorn Woodlands, Sand Movement corridors, and important wetlands like the Wild and Scenic Amargosa River, Salt Creek, and Bonanza Spring.
- \* Analyze how this plan impacts the National Park Service. Despite the significant acreage of our national parks in the plan area, the draft does not include discussion of how renewable energy projects will impact their viewsheds, clear night skies, and wildlife-rich neighboring lands.

Thank you for standing up for the California Desert!

Sincerely,

Mr. Paul Norton  
4616 Ensign Ave N  
New Hope, MN 55428-4731

1516 Ninth Street, MS-46, Dockets Office, MS-4, Docket No. 09-RENEW  
EO-01  
Sacramento, CA 95814-5512

Dear Mr. Beale,

As someone who cares about our California desert and our renewable energy future, it is essential that the 22.5 million acre Desert Renewable Energy Conservation Plan is finalized in a thoughtful way. With this in mind and with the goal of protecting our national parks, wilderness areas, wildlife and wild places for future generations, I strongly encourage you to improve this important plan in order to better protect its public resources:

- \* Protect Mojave National Preserve, adjacent Wilderness Study Areas, and key desert bighorn sheep habitat by not allowing the Soda Mountain Solar project to be sited next door to Mojave NP, as better locations for the project abound.
- \* Protect the remarkable Silurian Valley adjacent to Death Valley National Park by designating the landscape as National Conservation Lands.
- \* Better protect Joshua Tree National Park by preventing development in the Eagle Mountain region. We must safeguard public lands in this region from further threats and protect important habitat for desert bighorn sheep, golden eagles, and desert tortoise.
- \* Do not allow for renewable energy Development Focus Areas (DFA) to be designated in sensitive lands. The Lucerne region, the desert tortoise research natural area, Cadiz dunes area, and the Mountain Pass area should not be considered for DFAs.
- \* Protect wildlife routes and bird migration areas by supporting the protection of Sonoran Desert Thorn Woodlands, Sand Movement corridors, and important wetlands like the Wild and Scenic Amargosa River, Salt Creek, and Bonanza Spring.
- \* Analyze how this plan impacts the National Park Service. Despite the significant acreage of our national parks in the plan area, the draft does not include discussion of how renewable energy projects will impact their viewsheds, clear night skies, and wildlife-rich neighboring lands.

Thank you for standing up for the California Desert!

Sincerely,

Mr. Edward Morgan  
353 Taylor Rd  
Stow, MA 01775-1609

Mr. Chris Beale

1516 Ninth Street, MS-46, Dockets Office, MS-4, Docket No. 09-RENEW  
EO-01  
Sacramento, CA 95814-5512

Dear Mr. Beale,

As someone who cares about our California desert and our renewable energy future, it is essential that the 22.5 million acre Desert Renewable Energy Conservation Plan is finalized in a thoughtful way. With this in mind and with the goal of protecting our national parks, wilderness areas, wildlife and wild places for future generations, I strongly encourage you to improve this important plan in order to better protect its public resources:

- \* Protect Mojave National Preserve, adjacent Wilderness Study Areas, and key desert bighorn sheep habitat by not allowing the Soda Mountain Solar project to be sited next door to Mojave NP, as better locations for the project abound.
- \* Protect the remarkable Silurian Valley adjacent to Death Valley National Park by designating the landscape as National Conservation Lands.
- \* Better protect Joshua Tree National Park by preventing development in the Eagle Mountain region. We must safeguard public lands in this region from further threats and protect important habitat for desert bighorn sheep, golden eagles, and desert tortoise.
- \* Do not allow for renewable energy Development Focus Areas (DFA) to be designated in sensitive lands. The Lucerne region, the desert tortoise research natural area, Cadiz dunes area, and the Mountain Pass area should not be considered for DFAs.
- \* Protect wildlife routes and bird migration areas by supporting the protection of Sonoran Desert Thorn Woodlands, Sand Movement corridors, and important wetlands like the Wild and Scenic Amargosa River, Salt Creek, and Bonanza Spring.
- \* Analyze how this plan impacts the National Park Service. Despite the significant acreage of our national parks in the plan area, the draft does not include discussion of how renewable energy projects will impact their viewsheds, clear night skies, and wildlife-rich neighboring lands.

Thank you for standing up for the California Desert!

Sincerely,

Ms. Sybil Schlesinger
