California Energy Commission

DOCKETED

09-RENEW EO-1

TN 74616

FEB 20 2015

Feb 20, 2015

Mr. Chris Beale

1516 Ninth Street, MS-46, Dockets Office, MS-4, Docket No. 09-RENEW
EO-01
Sacramento, CA 95814-5512

Dear Mr. Beale,

As someone who cares about our California desert and our renewable energy future, it is essential that the 22.5 million acre Desert Renewable Energy Conservation Plan is finalized in a thoughtful way.

With this in mind and with the goal of protecting our national parks, wilderness areas, wildlife and wild places for future generations, I strongly encourage you to improve this important plan in order to better protect its public resources:

- * Protect Mojave National Preserve, adjacent Wilderness Study Areas, and key desert bighorn sheep habitat by not allowing the Soda Mountain Solar project to be sited next door to Mojave NP, as better locations for the project abound.
- * Protect the remarkable Silurian Valley adjacent to Death Valley National Park by designating the landscape as National Conservation Lands.
- * Better protect Joshua Tree National Park by preventing development in the Eagle Mountain region. We must safeguard public lands in this region from further threats and protect important habitat for desert bighorn sheep, golden eagles, and desert tortoise.
- * Do not allow for renewable energy Development Focus Areas (DFA) to be designated in sensitive lands. The Lucerne region, the desert tortoise research natural area, Cadiz dunes area, and the Mountain Pass area should not be considered for DFAs.
- * Protect wildlife routes and bird migration areas by supporting the protection of Sonoran Desert Thorn Woodlands, Sand Movement corridors, and important wetlands like the Wild and Scenic Amargosa River, Salt Creek, and Bonanza Spring.
- * Analyze how this plan impacts the National Park Service. Despite the significant acreage of our national parks in the plan area, the draft does not include discussion of how renewable energy projects will impact their viewsheds, clear night skies, and wildlife-rich neighboring lands.

Thank you for standing up for the California Desert!

Sincerely,

Ms. Aria Giaque

Feb 20, 2015

Mr. Chris Beale

1516 Ninth Street, MS-46, Dockets Office, MS-4, Docket No. 09-RENEW
EO-01
Sacramento, CA 95814-5512

Dear Mr. Beale,

Thank you for the opportunity to comment on the Draft Desert Renewable Energy Conservation Plan. I am a tax-paying US citizen and I believe that US wildlife belongs to me, too. More specifically, I feel a personal obligation to contribute positively to responsible stewardship of wildlife and natural resources.

It is important that you know that I feel this plan needs to be improved in order to better protect its public resources. I want you to add to this proposal so that you accomplish these tasks:

Protect Mojave National Preserve, adjacent Wilderness Study Areas, and key desert bighorn sheep habitat by not allowing the Soda Mountain Solar project to be sited next door to Mojave NP, as better locations for the project abound.

Protect the remarkable Silurian Valley adjacent to Death Valley National Park by designating the landscape as National Conservation Lands.

Better protect Joshua Tree National Park by preventing development in the Eagle Mountain region. We must safeguard public lands in this region from further threats and protect important habitat for desert bighorn sheep, golden eagles, and desert tortoise.

Do not allow for renewable energy Development Focus Areas (DFA) to be designated in sensitive lands. The Lucerne region, the desert tortoise research natural area, Cadiz dunes area, and the Mountain Pass area should not be considered for DFAs.

Protect wildlife routes and bird migration areas by supporting the protection of Sonoran Desert Thorn Woodlands, Sand Movement corridors, and important wetlands like the Wild and Scenic Amargosa River, Salt Creek, and Bonanza Spring.

Analyze how this plan impacts the National Park Service. Despite the significant acreage of our national parks in the plan area, the draft does not include discussion of how renewable energy projects will impact their viewsheds, clear night skies, and wildlife-rich neighboring lands.

Thank you for the opportunity to provide my comments.

Sincerely,

Mrs. Linn Barrett

With this in mind and with the goal of protecting our national parks, wilderness areas, wildlife and wild places for future generations, I strongly encourage you to improve this important plan in order to better protect its public resources:

- * Protect Mojave National Preserve, adjacent Wilderness Study Areas, and key desert bighorn sheep habitat by not allowing the Soda Mountain Solar project to be sited next door to Mojave NP, as better locations for the project abound.
- * Protect the remarkable Silurian Valley adjacent to Death Valley National Park by designating the landscape as National Conservation Lands.
- * Better protect Joshua Tree National Park by preventing development in the Eagle Mountain region. We must safeguard public lands in this region from further threats and protect important habitat for desert bighorn sheep, golden eagles, and desert tortoise.
- * Do not allow for renewable energy Development Focus Areas (DFA) to be designated in sensitive lands. The Lucerne region, the desert tortoise research natural area, Cadiz dunes area, and the Mountain Pass area should not be considered for DFAs.
- * Protect wildlife routes and bird migration areas by supporting the protection of Sonoran Desert Thorn Woodlands, Sand Movement corridors, and important wetlands like the Wild and Scenic Amargosa River, Salt Creek, and Bonanza Spring.
- * Analyze how this plan impacts the National Park Service. Despite the significant acreage of our national parks in the plan area, the draft does not include discussion of how renewable energy projects will impact their viewsheds, clear night skies, and wildlife-rich neighboring lands.

Thank you for standing up for the California Desert!

Sincerely,

Mrs. Karen Horton

Mr. Chris Beale

1516 Ninth Street, MS-46, Dockets Office, MS-4, Docket No. 09-RENEW
EO-01
Sacramento, CA 95814-5512

Dear Mr. Beale,

As someone who cares about our California desert and our renewable energy future, it is essential that the 22.5 million acre Desert Renewable Energy Conservation Plan is finalized in a thoughtful way. With this in mind and with the goal of protecting our national parks, wilderness areas, wildlife and wild places for future generations, I strongly encourage you to improve this important plan in order to better protect its public resources:

- * Protect Mojave National Preserve, adjacent Wilderness Study Areas, and key desert bighorn sheep habitat by not allowing the Soda Mountain Solar project to be sited next door to Mojave NP, as better locations for the project abound.
- * Protect the remarkable Silurian Valley adjacent to Death Valley National Park by designating the landscape as National Conservation Lands.
- * Better protect Joshua Tree National Park by preventing development in the Eagle Mountain region. We must safeguard public lands in this region from further threats and protect important habitat for desert bighorn sheep, golden eagles, and desert tortoise.
- * Do not allow for renewable energy Development Focus Areas (DFA) to be designated in sensitive lands. The Lucerne region, the desert tortoise research natural area, Cadiz dunes area, and the Mountain Pass area should not be considered for DFAs.
- * Protect wildlife routes and bird migration areas by supporting the protection of Sonoran Desert Thorn Woodlands, Sand Movement corridors, and important wetlands like the Wild and Scenic Amargosa River, Salt Creek, and Bonanza Spring.
- * Analyze how this plan impacts the National Park Service. Despite the significant acreage of our national parks in the plan area, the draft does not include discussion of how renewable energy projects will impact their viewsheds, clear night skies, and wildlife-rich neighboring lands.

Thank you for standing up for the California Desert!

Sincerely,

Ms. Hermine Willey

- * Protect the remarkable Silurian Valley adjacent to Death Valley National Park by designating the landscape as National Conservation Lands.
- * Better protect Joshua Tree National Park by preventing development in the Eagle Mountain region. We must safeguard public lands in this region from further threats and protect important habitat for desert bighorn sheep, golden eagles, and desert tortoise.
- * Do not allow for renewable energy Development Focus Areas (DFA) to be designated in sensitive lands. The Lucerne region, the desert tortoise research natural area, Cadiz dunes area, and the Mountain Pass area should not be considered for DFAs.
- * Protect wildlife routes and bird migration areas by supporting the protection of Sonoran Desert Thorn Woodlands, Sand Movement corridors, and important wetlands like the Wild and Scenic Amargosa River, Salt Creek, and Bonanza Spring.
- * Analyze how this plan impacts the National Park Service. Despite the significant acreage of our national parks in the plan area, the draft does not include discussion of how renewable energy projects will impact their viewsheds, clear night skies, and wildlife-rich neighboring lands.

Thank you for standing up for the California Desert!

Sincerely,

Ms. Diane Lewis

1516 Ninth Street, MS-46, Dockets Office, MS-4, Docket No. 09-RENEW
EO-01
Sacramento, CA 95814-5512

Dear Mr. Beale,

As someone who cares about our California desert and our renewable energy future, it is essential that the 22.5 million acre Desert Renewable Energy Conservation Plan is finalized in a thoughtful way. With this in mind and with the goal of protecting our national parks, wilderness areas, wildlife and wild places for future generations, I strongly encourage you to improve this important plan in order to better protect its public resources:

- * Protect Mojave National Preserve, adjacent Wilderness Study Areas, and key desert bighorn sheep habitat by not allowing the Soda Mountain Solar project to be sited next door to Mojave NP, as better locations for the project abound.
- * Protect the remarkable Silurian Valley adjacent to Death Valley National Park by designating the landscape as National Conservation Lands.
- * Better protect Joshua Tree National Park by preventing development in the Eagle Mountain region. We must safeguard public lands in this region from further threats and protect important habitat for desert bighorn sheep, golden eagles, and desert tortoise.
- * Do not allow for renewable energy Development Focus Areas (DFA) to be designated in sensitive lands. The Lucerne region, the desert tortoise research natural area, Cadiz dunes area, and the Mountain Pass area should not be considered for DFAs.
- * Protect wildlife routes and bird migration areas by supporting the protection of Sonoran Desert Thorn Woodlands, Sand Movement corridors, and important wetlands like the Wild and Scenic Amargosa River, Salt Creek, and Bonanza Spring.

Feb 20, 2015

Mr. Chris Beale

1516 Ninth Street, MS-46, Dockets Office, MS-4, Docket No. 09-RENEW
EO-01
Sacramento, CA 95814-5512

Dear Mr. Beale,

As someone who cares about our California desert and our renewable energy future, it is essential that the 22.5 million acre Desert Renewable Energy Conservation Plan is finalized in a thoughtful way. With this in mind and with the goal of protecting our national parks, wilderness areas, wildlife and wild places for future generations, I strongly encourage you to improve this important plan in order to better protect its public resources:

- * Protect Mojave National Preserve, adjacent Wilderness Study Areas, and key desert bighorn sheep habitat by not allowing the Soda Mountain Solar project to be sited next door to Mojave NP, as better locations for the project abound.
- * Protect the remarkable Silurian Valley adjacent to Death Valley National Park by designating the landscape as National Conservation Lands.
- * Better protect Joshua Tree National Park by preventing development in the Eagle Mountain region. We must safeguard public lands in this region from further threats and protect important habitat for desert bighorn sheep, golden eagles, and desert tortoise.
- * Do not allow for renewable energy Development Focus Areas (DFA) to be designated in sensitive lands. The Lucerne region, the desert tortoise research natural area, Cadiz dunes area, and the Mountain Pass area should not be considered for DFAs.
- * Protect wildlife routes and bird migration areas by supporting the protection of Sonoran Desert Thorn Woodlands, Sand Movement corridors, and important wetlands like the Wild and Scenic Amargosa River, Salt Creek, and Bonanza Spring.
- * Analyze how this plan impacts the National Park Service. Despite the significant acreage of our national parks in the plan area, the draft does not include discussion of how renewable energy projects will impact their viewsheds, clear night skies, and wildlife-rich neighboring lands.

Thank you for standing up for the California Desert!

Sincerely,

Ms. Lyn Blackston
10559 S 175th Ave

- * Protect the remarkable Silurian Valley adjacent to Death Valley National Park by designating the landscape as National Conservation Lands.
- * Better protect Joshua Tree National Park by preventing development in the Eagle Mountain region. We must safeguard public lands in this region from further threats and protect important habitat for desert bighorn sheep, golden eagles, and desert tortoise.
- * Do not allow for renewable energy Development Focus Areas (DFA) to be designated in sensitive lands. The Lucerne region, the desert tortoise research natural area, Cadiz dunes area, and the Mountain Pass area should not be considered for DFAs.
- * Protect wildlife routes and bird migration areas by supporting the protection of Sonoran Desert Thorn Woodlands, Sand Movement corridors, and important wetlands like the Wild and Scenic Amargosa River, Salt Creek, and Bonanza Spring.
- * Analyze how this plan impacts the National Park Service. Despite the significant acreage of our national parks in the plan area, the draft does not include discussion of how renewable energy projects will impact their viewsheds, clear night skies, and wildlife-rich neighboring lands.

Thank you for standing up for the California Desert!

Sincerely,

Mrs. Amala Kohler

Mr. Chris Beale

1516 Ninth Street, MS-46, Dockets Office, MS-4, Docket No. 09-RENEW
EO-01
Sacramento, CA 95814-5512

Dear Mr. Beale,

As someone who cares about our California desert and our renewable energy future, it is essential that the 22.5 million acre Desert Renewable Energy Conservation Plan is finalized in a thoughtful way. With this in mind and with the goal of protecting our national parks, wilderness areas, wildlife and wild places for future generations, I strongly encourage you to improve this important plan in order to better protect its public resources:

- * Protect Mojave National Preserve, adjacent Wilderness Study Areas, and key desert bighorn sheep habitat by not allowing the Soda Mountain Solar project to be sited next door to Mojave NP, as better locations for the project abound.
- * Protect the remarkable Silurian Valley adjacent to Death Valley National Park by designating the landscape as National Conservation Lands.
- * Better protect Joshua Tree National Park by preventing development in the Eagle Mountain region. We must safeguard public lands in this region from further threats and protect important habitat for desert bighorn sheep, golden eagles, and desert tortoise.
- * Do not allow for renewable energy Development Focus Areas (DFA) to be designated in sensitive lands. The Lucerne region, the desert tortoise research natural area, Cadiz dunes area, and the Mountain Pass area should not be considered for DFAs.
- * Protect wildlife routes and bird migration areas by supporting the protection of Sonoran Desert Thorn Woodlands, Sand Movement corridors, and important wetlands like the Wild and Scenic Amargosa River, Salt Creek, and Bonanza Spring.
