Good morning Please open the attached document for consideration concerning:

DRECP NEPA/CEQA [Docket: 09- RENEW EO-01]

I have composed a legitimate reason why your route closures need rethinking.

Thank you for your time,

Martin Dougherty, Retired Southern California Gas Company.

Please accept my apologies for the missing personal information on the last page.

Martin Dougherty

of the western edge of the eastern Superior Cronese ACEC. A DFA appears to cover some of this excellent collecting area, where agate, petrified palm root, jasper and chert are collected. I ask that the BLM designates this area as a new SRMA to protect collecting activities in it. If the BLM is unwilling to create a new SRMA designation for the Yermo collecting area, then please expand the Superior/Rainbow SRMA to include it, with specific provision for rock collecting as an allowable use in this area. At the least, the BLM should redefine the DFA encroaching this area, so that it excludes this collecting area from the DFA. Any designated routes that allow access to it should be included.

Yuha Basin

The south side of I-8 between Highway 98 and Dunaway Road has giant fossilized oyster shells that have been collected by rockhounds since the 1950s. Currently, this area has overlapping ACEC and NLCS designations. I ask that BLM allows rockhounding to continue as a permissible activity and all roads into the area be left open.

Sincerely, Martin Dougherty
