David G. Stuart
Corporate Secretary

Resolution Supporting Development of Peak-Load Power Plant in Romoland, California

WHEREAS, five years have passed since California experienced an energy crisis that resulted in exorbitant price spikes, electricity shortages and rolling blackouts; and

WHEREAS, the blackouts and price spikes created financial burdens for businesses, local government and consumers, hurting the economy and eroding quality of life; and

WHEREAS, the Edison Mission Group has proposed a new peaker power plant to serve peak electricity demands in central Riverside County and Southern California; and

WHEREAS, there would be 500 megawatts of electricity produced from the proposed Edison Mission Group's Peak-Load Power Plant; and

WHEREAS, development of a power plant would generate nearly 190 construction jobs and 9 full-time operating jobs; and

WHEREAS, Edison Mission Energy is committed to investing \$250 million for the development, construction and maintenance of a power plant; and

WHEREAS, construction and operation of the project would generate millions of dollars in tax revenue for the region; and

WHEREAS, the proposed location of the power plant would take advantage of existing distribution power lines, natural gas pipelines, and reclaimed water lines; therefore be it

RESOLVED, that the Perris Valley Chamber of Commerce supports the development of Edison Mission Energy's Peak-Load Power Plant in the Romoland region of unincorporated Riverside County.
