Subject: HECA emission reduction credits

Will -

Per you inquiry at the 4/12/10 CEC Data Response Workshop for the HECA project, below are the dates of emission reductions for the ERCs explicitly identified for the HECA project (per their 4/2/10 CEC submittal - Response to Data Request No. 8").

ERC#	pollutant	tpy	date of emission reduction
S-3273-2	NOx	241.00	11/30/83
S3275-5	SOx	84.00	3/1/92
S-3305-1	VOC	29.25	9/10/79
C-1058-2	NOx	20.20	1/7/08
C-1058-5	SOx	49.00	1/7/08

In reading HECA's 4/2/10 submittal, the above ERCs have been purchased (confirmed by our records) for use for the project. However, additional ERCs from AER Glan (VOC) and GIC Financial Services (NOx and SOx) will be procured later in the project development process. As such, the ERCs identified in this submittal represent just a portion of their offset package.

Please let me know if there is any other information from our records that we can provide to you.

Thanks
