

**APPENDIX A – 4**

---

**AIR QUALITY  
PROJECT EMISSIONS OFFSETS**

Emission offsets for the Larkspur Project are not required based on the requirements of Rule 20.3 and consultation with the SDAPCD. The Larkspur 3 Project has, however, committed to purchasing emission reduction credits (ERC) to fully offset the Project's annual emissions of nonattainment pollutants and their precursors at a 1:1 ratio to fully mitigate project emissions. The annual total project emissions that will be offset with ERCs are presented in Table A-4-1.

<b>Pollutant</b>	<b>Maximum Annual Emissions (tons/year)</b>
NO <sub>x</sub>	9.74
VOCs	2.76
SO <sub>x</sub>	1.83
PM <sub>10</sub>	8.15
