PROJECT TITLE: Blythe Energy Project Phase II

<input type="checkbox"/> Telephone	(760) 922-3144	<input type="checkbox"/> Meeting Location:	
NAME:	Roger Henning	DATE:	6/01/05
WITH:	Palo Verde Irrigation District		
SUBJECT:	2-week maintenance period for Rannells Drain		

Per telephone conversation with Roger Henning:

BEP II would have access to PVID water from Rannells Drain (which takes the water away from under the farm land), or Rannells Canal (which provides irrigation water to farmland), or by pumping groundwater directly...it is all water that is accountable under PVID.

As for the 2-weeks when Rannells drain is closed for maintenance; PVID can make arrangements so that drain water is impounded and drain water would be available to BEP II. Alternatively, PVID can provide canal water or groundwater to BEP II when Rannells Drain is closed. Mr. Henning stated that there is no need for BEP II to provide redundant equipment or another source of water.
