Docket No. 04-AFC-01

SFERP STATUS REPORT #6

The Committee Interim Scheduling Order issued on May 19, 2005 requested that the parties file status reports to inform the Committee of the progress of the case, as well as the emergence of any matters which may delay (or accelerate) issuance of significant documents such as the PSA. This Status Report by the City and County of San Francisco ("City" or "Applicant") for the San Francisco Electric Reliability Project ("SFERP") addresses the status of the licensing proceedings since the City filed its last status report on July 11, 2005.

On March 29, 2005, the City filed a revised application with the Bay Area Air Quality Management District (BAAQMD) addressing the new location for the SFERP. A preliminary determination of compliance (PDOC) was issued by BAAQMD on July 26, 2005. On August 4, 2005, the City filed its proposal for an air quality plan to address the impacts of particulate emissions from the SFERP, and for a community benefits plan.

During the past month, the City has continued to respond to data requests. The deadline for intervenor data requests was June 24. The City filed responses to staff data requests on July 11, 19, and 25, and August 10. The City filed responses to intervenor Sarvey's data requests on July 25. Three outstanding submissions by the City and their expected submission dates are as follows:

- 1) a revised storm water prevention plan in light of recently identified storm water management requirements, to be filed the week of August 15, 2005;
- 2) a laboratory report for the geotechnical borings, to be filed no later than the end of August; and
- 3) a cultural resources report addressing the findings from the geotechnical borings, to be filed no later than the end of August.

With the submission of the PDOC, the City looks forward to a prompt resumption of the procedural schedule and to continuing to work constructively with staff and other parties to provide for a timely Commission Decision in early Spring 2006. A timely decision in this matter remains critical to supporting a mid-2007 in-service date, which in turn will provide the basis to

terminate the reliability must run agreements for the Potrero power plant at the conclusion of 2007.

Dated: August 11, 2005

Respectfully submitted:
