

TELEPHONE CONVERSATION RECORD

DOCKET  
04-AFC-1  
DATE OCT 26 2005  
RECD. OCT 26 2005

Call To: Leslie Lacko Date: October 26, 2005  
Phone #: (415) 352-3646 Time: 10 am  
Company: BCDC Project #: 1701.01  
Project Name: CEC SFERP  
Subject: Request for Information/Clarification - SFERP & BCDC Consistency Determination

**Conversation Summary:**

Mark Lindley, PWA, spoke with Leslie Lacko at BCDC on 10/26/05 as a follow-up to a brief discussion on 10/17/05.

Ms. Lacko indicated that BCDC has reviewed the SF ERP and determined that the project was well outside of BCDC's jurisdiction and would have no significant impacts in the coastal zone. She did identify a visual impact, which was determined to be less than significant. One change in the project description since the BCDC review was the use of vegetated swales to route stormwater runoff into the Bay (the original project description indicated that stormwater runoff would be discharged to the combined sewer system). Ms. Lacko felt that this change could be handled with a separate permit for the drainage swales and outfall to the bay.

If a Federal permit were required for the project, BCDC would look at impacts in the coastal zone. Ms. Lacko indicated that BCDC has not required a Consistency Determination from SF ERP. If SF ERP needs to submit a Consistency Determination, it is a relatively quick process. SF ERP would prepare a Consistency Determination report and BCDC would have 60-75 days to respond to the Consistency Determination.

Ms. Lacko concluded the conversation by noting that if BCDC had concerns and/or thought this project was in their jurisdiction, they would have submitted comments on the AFC and PSA to the CEC.

**Follow-up / Action Items:**

Check with CEC/Applicant on the need for a Consistency Determination.
