Sacramento, CA 95814-5512

Subject: **PASTORIA ENERGY FACILITY EXPANSION PROJECT (05-AFC-1),
STATUS REPORT #2**

On November 28, 2005, Energy Commission staff issued the Final Staff Assessment (FSA) for the Pastoria Energy Facility Expansion Project. With respect to Transmission System Engineering, the FSA contains only a general discussion of potential mitigation measures that were identified in the System Impact Study.

Staff is awaiting the technical assessment from the Transmission Facilities Study, which is being performed by Southern California Edison to determine what final mitigation measures will be recommended for the transmission impacts of the proposed project. The study was originally expected to be completed in early October but is now due January 4, 2006. The CAISO will have thirty days to review the study and decide what specific mitigation to approve. Staff will concurrently review the technical portion of the Facilities Study and begin preparation of a supplement to the FSA, analyzing the environmental and other impacts of the specific measures discussed in the Facilities Study.

The applicant has filed an Environmental Analysis that addresses one of the five potential mitigation measures previously identified in the System Impact Study. Once the CAISO has approved and the applicant has selected, a specific measure, staff will complete its analysis. Staff plans to file its supplement within 30 days after receipt of the final CAISO approved measure, but may require additional time to complete its analysis, depending on the nature of the final mitigation measure chosen.
