Che,

Provided below, is a response to item 1:

1) As a "worst case" estimate, the quantity of spent SCR catalyst expected to be disposed of every 4 to 5 years (per table 5.14.-3 of the AFC) is an estimated 35,000 lbs of catalyst material (48,000 lbs including steel of catalyst module) per unit.

We will get back to you ASAP with a response to item 2. Thank you!

Kindly,

Amy Gramlich,

SubjectRe: Fw: Draft Starwood Power-Midway
 Analysis

Hi Angela,

We're still waiting on a few minor pieces of information. See below. Given the delay in receiving some materials such as this PDOC, which we expect to receive in it's entirety on Monday, and the peak workload we're experiencing we do not expect to be able to deliver the PSA ahead of schedule.

1) The quantity of spent SCR catalyst expected to be disposed of every 3 to 5 years (per table 5.14.-3 of the AFC).

2) Source of fill material to raise the site elevation by 3ft. We've been informed that the soil would come from on site but how that would be accomplished has not been explained.

Have a good weekend.

Che,
FYI.

I think this was the last outstanding item, right? Any chance of getting the PSA out sooner than June 30th?

SubjectAnalysis

Good Morning Will,

The PDOC for Starwood Power-Midway, LLC should be mailed out later this afternoon. Please note that a few of the appendices are missing in the attached document. If you find that you need those appendices, please let me know and I will try faxing or emailing them to you. Let me know if you have any questions or need additional information. Thanks!
