Bob,
Please forward to CH2Hill the following request for data/information that we would like to have to improve the accuracy of our analysis for Highgrove Socioeconomics based on the constuction of the Water Supply Line that will require additional workers. Having reviewed the AES Highgrove Project (06-AFC-2) Supplement C Socioeconomics please provide in 2005 dollars consistent with your previous work:

- revised economic impact analysis for income and employment secondary impacts for constuction.
- revised construction sales tax (total and local).
- revised construction material and supplies estimates (total and local).

Thank you,
Joseph Diamond Ph. D.
Economist
California Energy Commission
